

Dear ADANW Family,

Springtime is one of my four most favorite seasons, a time of rebirth and growth, and bountiful optimism. Excitement is in the air, and don't we all so deserve it.

For the past several years, we have expanded the services at ADANW to include life-changing things like TMJ/TMD care, and life-extending care for airway and apnea issues. These are areas which are dramatically under-served, and which I find to be an ideal evolution and synthesis of all my dental education, training, and experiences. I want to concentrate on providing as much care as I can, by restricting my time to these specialties.

So it is with great pleasure and pride that I announce the merger of ADANW with the office of Dr Hyungsup (Sup) Lee.

Sup comes to us with eight years experience in providing top flight dental care in Portland. Many of you may already know Dr Lee, as he has placed dental implants for our patients for years, with a 100% success rate. He is proficient not only in implant placement and restoration, but also in all phases of Dentistry, including comprehensive Restorative (Crowns, Bridges, Composites), Endodontics and Oral Surgery. Dr Lee shares our "Patient First" philosophy of service and with well-honed expertise. You will find him friendly, compassionate, meticulous, and very comfortable to work with. You may also recall Kim, his wife, who for a long while was our Dental Hygienist.

He is a very skilled and personable dentist, and one of the very few to whose care we would entrust our patients. I look forward to personally introducing you at your next visit.

With this merger, you will have greater, and more comprehensive, dental options available right here, and in time frames that may be more flexible and convenient to your schedule. And as I continue to devote more time to Airway, Orthodontics, and TMJ, both Dr. Lee and I are confident that our Dental Family will continue to receive the highest level of personalized and professional care anywhere.

We all look forward to our next visits!

Take good care,

Russ Teasdale, DMD
